

Dental Hygiene

We use teeth to crush our food and break it into pieces.
Teeth are alive. We must look after them.

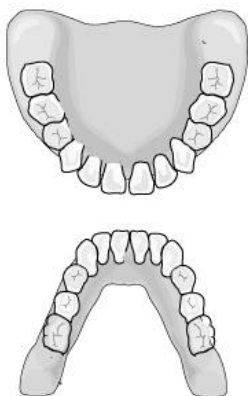

Teeth do not like acidity. This is why we use a toothbrush after every meal to get rid of any food residue!

My Teeth are Alive

Look at these drawings of upper and lower jaws and of teeth.

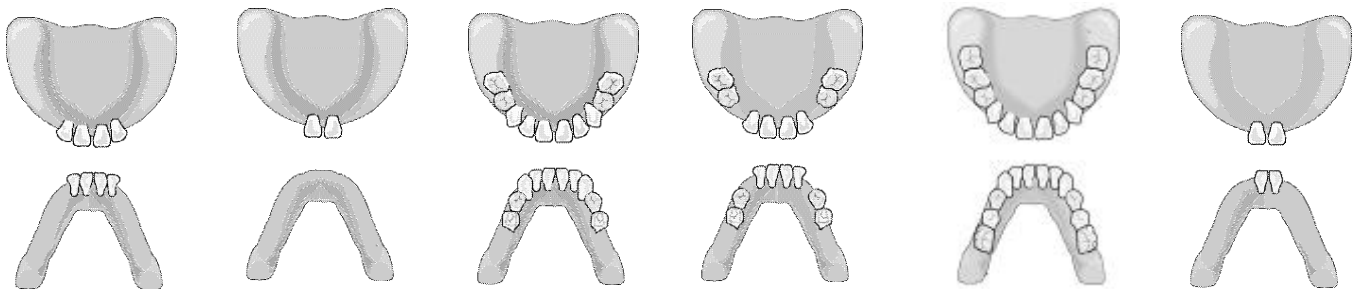

- 1 - Colour the incisors yellow; the canines red; the molars green.
- 2 - Then count the number of incisors, canines and molars. Write the answers in the boxes..

Cutting tooth	→		<input type="checkbox"/>	incisors
Pointed tooth	→		<input type="checkbox"/>	canines
Grinding tooth	→		<input type="checkbox"/>	molars

Order In Which Teeth Appear

Write 1, 2, 3, 4, 5, 6 under the drawings to show in which order teeth appear.

No. No. No. No. No. No.
